

CRUD operation

create index.js file

Insert

write a function that lets you insert data in User table.

```
const { PrismaClient } = require("@prisma/client"); //import PrismaClient
const prisma = new PrismaClient()

async function addUser(name,email){
  let newUser= await prisma.user.create({
    data:{
      name:name,
      email:email
    }
  })
  return newUser;
}

addUser("Kartik","Kartik@codingblocks.com")
.then((user)=>{
  console.log("User added:",user);
})
```

```
//postgresql query for same
INSERT INTO "user" (name, email)
VALUES ('Kartik', 'Kartik@codingblocks.com');
```

Read

Write a function that let's you fetch the details of a user given their email

```
async function getUsers(email){
  let user = await prisma.user.findUnique({
    where:{
      email:email
    }
  })
  return user;
}
getUsers("Kartik@codingblocks.com")
.then((user)=>{
  console.log("User fetched:",user);
})
```

Don't forget to comment addUser function call as it will run again and will throw error as email field is unique in our schema.

```
//postgresql query
SELECT *
FROM "User"
WHERE email = 'Kartik@codingblocks.com'
LIMIT 1;
```

Update

Write a function to update user name given email of a user.

```
async function updateUser(email,updatedName){
  const updateUser = await prisma.user.update({
    where: {
      email: email,
    },
    data: {
      name: updatedName,
    },
  })
  return updateUser;
}
```

```
}
updateUser("Kartik@codingblocks.com", "Kartik Mathur")
.then((user)=>{
  console.log("User updated:", user);
})
```

```
//postgresql query
UPDATE "User"
SET name = 'Kartik Mathur'
WHERE email = 'Kartik@codingblocks.com';
```

Delete

write a function to delete a user given their email

```
async function deleteUser(email){
  const deletedUser = await prisma.user.delete({
    where: {
      email: email,
    },
  })
  return deletedUser;
}
deleteUser("Kartik@codingblocks.com")
.then((user)=>{
  console.log("User deleted:", user);
})
```

```
//postgresql query
DELETE FROM "User"
WHERE email = 'Kartik@codingblocks.com';
```
